

**Internal reference: OSK2018-09**

Osisko Mining Inc. is a mineral exploration company focused on the acquisition, exploration and development of precious metal resource properties in Canada. In order to support our operations, we are looking for a:

### **Water Treatment Operator**

The duties of the water treatment operator will be exercised under the authority of the Osisko Mining Inc. Senior Environmental Technicians. The Water Treatment Operator will be in charge of the operation of the effluent treatment system and its sampling. The incumbent will be required to work closely with the Senior Environmental Technicians, surface facilities personnel and other members of the Company. Based at Lake Windfall's advanced exploration project, he will be working on a 15/13 schedule, fifteen days of work, thirteen days off.

#### **Responsibilities**

- Ensure the proper functioning of all elements (including pumping system) and all units involved in effluent treatment including start-up and shutdown;
- Carry out various tests (pH, ammoniacal nitrogen, etc.) used to adjust the treatment of the effluent;
- Record the different data of the treatment system (flow rates, pH, turbidity, etc.) and record them in the Excel spreadsheets;
- Ensure the filling of the different reagents involved in the treatment;
- Maintain the effluent treatment system including winterization;
- Carry out the sampling of the effluent according to the Directive 019 and proceed with sample shipment in the various laboratories;
- Ensure the proper operation of the composter;
- Support senior technicians in performing their tasks as needed;
- Protect the environment and prioritize sustainable development (economic, social, ecological);
- Prioritize the health, safety at work aspect through the design, tasks and work performed for the Company and its various associated companies;
- Ensure that all environmental policies and procedures of the Company are implemented and respected;
- Work as a team through collaboration, information sharing and efficient communication;
- Any other related tasks that will make the project a success.

#### **Education and formation**

- Have a degree in a relevant discipline. The diploma could be compensated by an experience;
- Hold a valid Class 5 driver's license;
- Have passed the 1-2-3-4-5 and 7 mining modules (asset).

#### **Technical knowledge**

- Have 2 years of experience as a water treatment operator or in a related field;
- Intermediate level with Microsoft Excel spreadsheet;
- Basic knowledge in chemistry and science;
- Knowledge of pumps and plumbing concepts;
- Knowledge of WHMIS to work safely with chemicals.

#### **Basic skills**

- Must be able to communicate in French;
- Have good adaptability and be open to constructive changes and comments;
- Have an excellent sense of organization and good ability to recognize priorities;
- Be autonomous, possess initiative and be able to handle multiple files simultaneously;
- Have a good sense of observation, logic and thoroughness.

#### **Contact**

Osisko Mining Inc. thanks all applicants for their interest but wishes to advise you that only those selected for an interview will be contacted.

Interested candidates should submit their curriculum vitae by October 21<sup>st</sup>, 2018 at [careers@osiskomining.com](mailto:careers@osiskomining.com). It is important to enter the following display code in the subject line of your email: **OSK2018-09**.
